<https://rumble.com/search/all?q=hide-bezzle>

will, at least eventually,  
have a LOT of videos.

<https://icanfundtheusa.com/>

This is **Hide-Bezzle** book 6 (pages 601 - 620), and it serves at least 3 purposes:

- 1) Provide additional info to assist readers in understanding **Hide-Bezzle** book 5.
- 2) Show **DOGE** (X, formerly Twitter) how to cut federal government expenses.
- 3) Save **criminals** at Tampa General Hospital (**TGH**) who might commit **suicide**.  
**Suicide?** Why would rich, and successful, people want to commit **suicide**?

Um, 'cause they're about to get busted for covering up hundreds of millions of...  
...dollars in lifetime **embezzlement**, at **TGH**, by not only their own professional...  
...ancestors, but also by them. This goes for board members, the CEO / CFO,...  
...and EVERYONE ELSE who knowing, and/or willingly, assists with this **crime**.

Do "welfare checks" on them. Ask their family members, if any of their family...  
...members still hang out with them, whether they're exhibiting signs of distress,...  
...or if they act differently than they did prior to **Hide-Bezzle** book 5, because...  
...we have to keep them alive, you know, so that we can put them on trial, duh.

Here's a quick summary of why **I am correct**, and THEY are horrible **criminals**:

Page 508 - This page is PER **TGH**, not me. **My** format, yes, but **their** numbers.

Page 509 - This page is PER **TGH**, not me. **My** format, yes, but **their** numbers.

Page 510 - Anyone in management, at **TGH**, will verify the FACT that, like at all...  
...entities, **TGH** (1) Automatically reverses liability accruals & then...  
...(2) Pays invoices against the income statement. So, since this is...  
...TRUE, cell G26 is believable, and that leads to ALSO being able...  
...to believe that the value in cell J28 is ALSO correct. Hm, ok.

Page 511 - Ok, so the "reserve" lines (row 28, and row 46) are TEMPORARY...  
...holding spots for "prior liability accrual related" **cash** that **TGH**...  
...pays out (or at least likely pays out some of). That makes sense...

Page 512 - Since **TGH** really DOES **embezzle cash**, this page makes sense.

Page 513 - This is the page that **TGH** will point to when they say "See, this is...  
...what REALLY happened!" Ok, **TGH**, if page 513 is what REALLY...  
...happened, then on your 2024 audit report, show it to us like that...

These people sicken me. It's up to **We The People** to stop them ASAP, please.

<https://icanfundtheusa.com/>

**Hide-Bezzle** (2024 book # 5) was the 20-page book that I completed this week. **Hide-Bezzle** is the **CRIME** of **EMBEZZLING CASH** from a business, an "entity." Acronyms: CPA stands for "Certified Public Accountant," and FY = Fiscal Year. Unlike **Hide-Bezzle** book 5, this is not a math, and / or accounting, type proof. Instead, this document reviews the many flaws of CPA firm "audit" methodology.

Here, I make 4 **POINTS**, and then, on Page 605, **POINT 5** ties them all together.

**POINT 1**: How do CPA firms "audit" both types of income statement expenses?

1) Income statement **cash** expenses...

...are a (+) to expense, and a (-) to cash.

Then, at the end of the FY:

With a **-X**, expenses get zeroed out, and the **+X** side moves to Net Assets. Cash always "lives" on the balance sheet, and it **just stays put** (spent).

2) Income statement **accrued** expenses...

...are a (+) to expense, and a (-) to some "accrued" **liability** account.

Then, at the end of the FY:

With a **-X**, expenses get zeroed out, and the **+X** side moves to Net Assets. The **liability** account **-X**, which was "born" 3 lines above, **just stays put**.

From my 20-page **Hide-Bezzle** book 5: The very next FY starts with all of the...  
...accrued expenses being completely (100%) reversed out of all of the liability...  
...accounts, and then the other side of those "reversing" journal entries is either...

(a) Moved, at the **-X** value, to expense accounts on the **entities books**, or...

(b) Moved, at >100% (or <100%) of **-X**, to expense on only the **audit report** so...  
...that the senior most managers can **Hide-Bezzle**, as they do every single...  
...FY 100% of the value of the total of all FY ending accrued liability accounts.

So, how do (usually) junior auditors "audit" both types of expenses? It's easy!

**Cash** expenses: Just follow the trail of, well, those **CASH** payments. Done.

**Accrued** expenses: Verify whatever "thing" upon which the accrual was based.

Accruals are based on (1) invoices that DO get paid, or (2) still unpaid estimates. Since the audit report takes MONTHS to issue, just verify as many subsequent...  
...payments as possible, and follow up, during the next FY, to prove the rest.

<https://icanfundtheusa.com/>

Remember, **Hide-Bezzle doesn't**, **necessarily**, claim that accruals **weren't** paid. Instead, my 20-page **Hide-Bezzle** book 5 PROVES that **cash** simply disappears.

A final point to make, about "auditing" expenses, is the "materiality" concept. For my non-accountant readers, the "materiality" concept is easy to understand.

Example: Let's assume that you're in the market for a nice red apple to eat. If I tried to sell you a nice red apple, for 10 cents, would you buy it? Maybe, yes.

Ok, but what if I tried to sell you that exact same nice red apple for \$1,000,000? What? I want one **MILLION** dollars for only that **ONE** nice red apple? In 2024? Maybe in some hyper-inflation type economy, yes, but certainly **not** in 2024!

Ok, then at what EXACT dollar value would you go from "buy" to "no, thanks?" Hm... EXACT? Well, that EXACT value might be difficult to ascertain, you say. It might depend on how hungry you are, or how much **cash** is in your pocket. However, most people would be able to identify SOME \$ point of YES vs. NO.

That's materiality: The point at which **available information** changes your mind.

What if company X bonds are valued at \$X/bond. Would you buy? Maybe, yes. What if I told you that company X overstated their **cash** by **BILLIONS** of dollars. What? Yes, some **Hide-Bezzle** entities have **BILLIONS** in **accrued liabilities**.

Well, now that I know that their books are CRAP, maybe I won't buy their bonds. (Since their assets are overstated by **BILLIONS**, then their ratios are all wrong.)

When auditing expenses, auditors use lots of techniques that provide assurance. Not ABSOLUTE assurance, but enough assurance to claim "materially" correct. So, are entity expenses correct to the penny? Um, no, but they're close enough.

Close enough for what? Close enough for it to NOT change YOUR decision. You might still purchase their stock, or bonds, if expenses were slightly different. Slightly different, but not MATERIALLY different. Materiality is not a set "thing."

So, when (usually) junior auditors "audit" expenses, they consider materiality.

**POINT 1** (on page 602) was expenses. FYI, revenue isn't a part of **Hide-Bezzle**.

<https://icanfundtheusa.com/>

**POINT 2:** How do CPA firms "audit" balance sheet accounts, **except for cash**.

FYI, the Statements of Cash Flows (**SCF**) is a (supposedly) "audited" report.

Most folks are at least vaguely familiar with:  $\text{Assets} = \text{Liabilities} + \text{Net Assets}$   
Put \$100 of your own **cash** in the bank: \$100 = \$0 + \$100 (Equity)  
Borrow \$100, and put it all in the bank: \$200 = \$100 + \$100 (Equity)

We could go on, and on, but you get the point. Each category has "stuff" in it. Well, when you "audit" the balance sheet, you review all account reconciliations.

Balance sheet "account reconciliations" consist of at least two things:

- (a) Paper copy: High level summary of detail, all the way down to detailed level. If high level, then the associated detail is also made available to auditors.
- (b) Computer files might be Excel spreadsheets that tie to the paper copy. They also might be files from any type of entity specific support system...

"Reconciliations" **start with the previous FY balance, and then show ALL activity**. Entity accountants (like me) very diligently, and constantly, update these files. Accountants ensure that reconciliations match the general ledger balance (duh).

By the time the auditors show up, accountants (like me) are happy to share: "Account reconciliations for EVERY balance sheet account? No problem! Here."

EVERY balance sheet account, correct? Um..., yes! EVERY single account...  
...um, except for **cash**, because NOBODY in the business world provides...  
...auditors with an actual "reconciliation" of the MANY **cash** accounts that...  
...roll up into the audit report line item "Cash and cash equivalents," ha-ha... ???

Oh, yeah... Entity **cash** is "reconciled" (**Hahaaaaahaha**) on the **SCF** report.

Folks, the **SCF** report is **NOT**, I repeat **NOT**, an acceptable "reconciliation."

If the **SCF** report was a TRUE "reconciliation," then it would (see above)...  
...**start with the previous FY balance, and then show ALL activity**. "Activity"...  
...**WOULD** be like page 513 in my **Hide-Bezzle** book 5, but **NOT** like page 508.

<https://icanfundtheusa.com/>

**POINT 3:** What are the major "talking points" of CPA firm auditors?  
FYI: **GAAP** = Generally Accepted Accounting Principles  
FYI: **GAAS** = Generally Accepted Auditing Standards

Major talking points are the things that **Hide-Bezzle criminals** LOVE to discuss.

Let's just agree that revenue is ok! Using **GAAP / GAAS** approved procedures:

- (a) Verify the expenses that the entity claims in ALL of their expense accounts. Again, as discussed earlier, "materiality" is important (see page 603).  
FYI, on Planet Earth, (likely) no entity "audits" 100.00000% of ALL expenses.
- (b) Verify that ALL balance sheet STARTING Balances are the same as the ENDING audited Balances were at the end of the previous FY (this is MANDATORY).
- (c) Verify that all balance sheet account **ending balance** values are reconciled.

All of that sounds pretty good, and in real life, it ALWAYS works on everyone. So, what's the problem with 3a, 3b, and 3c? Look again at "POINT 2"...  
Verifying only the "**ending balance**" of **cash** is what allows **Hide-Bezzle** to exist.

Ending values: Compare balance sheet **cash** to the **SCF** report **cash** value: Yes, those **fraudulent** values are the same, but real life's a completely different...  
...story, folks, because in real life, **cash** is nothing more than a "push" number,...  
...and **cash** is NEVER properly reconciled (see page 604).

**POINT 4:** Accountants use the "push" term a lot, so what is a "push" number?

Many students are familiar with this: If " $3 + x = 5$ ," then "x" is the "push" number. In the case of the simple equation above,  $x = 2$ . No imaginary numbers here!

**POINT 5:** Audit reports don't use the real life "Cash and cash equivalents" value.

What...?! How is that possible? To **We The Slaves**: Re-read pages 602 to 605. Audit CPA firms consider "Cash and cash equivalents" to be just a "**PUSH**" value. Like a drunk, **TGH** might spend every dollar they get & then just lie on their **AFS**. "Real life" **cash** is less than the audit report value by who knows how much (?).

<https://icanfundtheusa.com/>

CPA firm issued Audited Financial Statements (**AFS**) are called Audit Reports. **AFS** are approved, annually, by a CPA firm Audit Partner, or an individual CPA. The Internal Revenue Service (**IRS**) is where most entities file their tax return(s). Entities that do **not** commit the **Hide-Bezzle crime** are **not** included in this book.

What are the high-level classifications of "**Hide-Bezzle** offending" entities?

"**Hide-Bezzle** offending" entities exist in 3 forms, Type 1, Type 2, and Type 3:

- 1) Entities that issue their **AFS** to the general public (voluntarily, or mandatorily).
- 2) Entities that keep their **AFS** private, that is, NOT in the "Public Domain."
- 3) Entities without **AFS** may report account balances only on various tax returns.

All type 1 **Hide-Bezzle** offending entities **SHALL WAFFLE** their **embezzlement**. (See page 519 in **Hide-Bezzle** book 5: See column F, and also column G.)

**WAFFLE**? Do you know how chameleons move? They waffle back, and forth. Two steps forward, one step back, or some other apparently random pattern. They do this to try to remain as invisible as possible to **unsuspecting PREY**.

Type 1 entities do this to **We The People**, their **unsuspecting PREY slaves**. Annually, they vary (up & down) all of their accrued liabilities (and some assets). This technique worked marvelously, that is, until I started to analyze **AFS**...!

Type 2 entities, and I'm only guessing here, just increase **Hide-Bezzle** annually. If the **IRS** is clueless (by design, or they're just stupid), then... Why not, right? Seriously, if the **IRS** stays mum, then "**Let's create inflation!**" would be their plan.

Type 3 entities likely involve a CPA with their tax return(s), just for safety, but...  
...if an entity is small, and the owner(s) understand **Hide-Bezzle**, then the entity...  
...might just independently increase their accruals every year for decades...

Make no mistake, folks, if entity **AFS** are available to the general public, then...  
...people like me (and now YOU) will know, **for sure**, whether they **Hide-Bezzle**.

However, if an entity is either Type 2, or Type 3, then folks like me (and YOU):

- \* Must rely on **other methods** to only **guess** at whether they **Hide-Bezzle**.
- \* **Other methods** may be **subjective**, and therefore, **not** necessarily correct.
- \* Do they transact lots of **cash**? Does ownership spend lots of personal **cash**?

<https://icanfundtheusa.com/>

For purposes of this page: **ASSUME** that I am 100% correct about **Hide-Bezzle**.

What's happening as State Boards of Accounting (BOA) take time to decide?

We all know that we're all waiting for one particular State BOA to **properly** rule. If we assume that **Hide-Bezzle** is correct, then that one State BOA knows it, too. Hm, if that one PARTICULAR State BOA knows it, too, then who else knows it?

Well, as time passes (tick, tick, tick...), more investors know it every single day...

Since my **Hide-Bezzle** book 5 is SO convincing, then many people could be...  
...pulling their money OUT of the "corporate bond" market, and moving it to the...  
...stock market, because (as you know from my **Hide-Bezzle** book 5), I predict...  
...that just as the bond market collapses, to \$0, the stock market will fly high.

Please do not use my documents to make investment decisions, but if I had...  
...any corporate bonds, myself, then I would have sold them by now. Truth.

Again, what's happening as State BOA take their good old time to properly rule?

Although I have NO WAY to verify this particular theory, my guess is that:

- \* LOTS of smart people are selling off their bonds, and that same group of...
- \* LOTS of smart people are using that bond related **cash** to purchase socks.

Ok, well... That's **great** for them, correct? Yup, yup, yup. **Super-duper great**.  
Ok, well... What about all of the other people, you know, the schmucks?

You mean most of "**We The People**," or "we the **unsuspecting PREY slaves**?"  
Yes, that is the correct group of "schmucks" that I referred to a few lines above.  
Oooooooh, them... Yeah, the schmucky "**We The People**" group are screwed.

I know, many folks think that my "cure" is going to be worse than this "disease."

When that one "committed" State CPA board finally does "**proceed**," we'll have...  
...to pay close attention to what happens to the bond market, because at that...  
...point, we'll be able to investigate whether said State CPA board paused in...  
...order to give "**CERTAIN PEOPLE**" time to casually move **ALL** of their wealth...  
...**FROM** the soon to collapse bond market **TO** the soon to boom stock market.

<https://icanfundtheusa.com/>

Someone said: "...will be the end of **capitalism** as we now know it in the USA." Hahaaaaaaha! At this very moment, **capitalism** does not exist in the USA. Duh.

Our business world is **obsessed** with fiscal year (FY) ending accrued liabilities. That's it. The only thing that matters is: How much **cash** can we steal this FY?

If **cash** really is just a "push" value, then entities like **TGH** are really dead broke. Broke like, you know, most people are 10 minutes after they get their pay check. "We're just investing the accrual related **cash**"... Bunk. Ynz spent it LONG ago.

If you think that **TGH** is in the business of providing healthcare to the people... ..then you are one of the sheople, that is, the people who act like sheep. Baaaa.

Wake up! **TGH** is a **cash** cow, it is just another, of **MANY**, **cash** cows. Period. They (CEO Little John **Couris**'s masters) pre-determine ALL financial values.

If the CEO's global masters want more **cash**, then profit goes down (vice versa).

If you think that "operations" (HAHA) at **TGH** have ANYTHING to do with profit... ..then think again! The **TGH** CFO was already told, many months ago, what... ..his audited "books" would look like for the FY that just ended on 09/30/2024.

This is all controlled (through the corrupt **TGH** CPA firm KPMG, LLP) by people... ..who control, essentially, everything that goes on in the business world today.

I think that the "we're ready to **proceed**" State Board of Accounting (BOA) was... ..patiently waiting for the November 5th presidential election to be decided... ..(which might happen sometime in November, or December, unlike in the old... ..days, when "paper only" elections were decided ON election day) so that... ..their decision cannot be construed to have been **election interference**, and... ..then, at that point, they will decide in my favor, which will be just like when... ..you knock over that very first domino, in a building full of carefully lined up... ..dominos. Boom, it will start, and at that point, get ready for a LOT of trials.

You know what? Let's get back to some form of **capitalism** that is closer to... ..pure **capitalism** than what we have now, which is just greedy **Hide-Bezzle**.

Even then, our "FIAT" currency will prevent pure **capitalism**. Oh, well, I tried.

<https://icanfundtheusa.com/>

"Entity"... What is it? In my books, and papers, an entity is **any** type of business. "Entity" includes **ALL** types of companies, partnerships, sole proprietorships, etc. "Entity" definitely includes any, well, "entity" that can successfully **Hide-Bezzle**.

Debt. Do you know that virtually every single USA entity is in some kind of debt? How can it be that, seemingly, EVERYONE owes money to some other entity? The answer is, in fact, far simpler than what you hear from media talking heads.

Without **Hide-Bezzle**, our overall economy would exist as a balanced equation. Some entities would exist to loan \$\$, and most would borrow only when needed.

Our "debt" problem exists, because folks over-claim fiscal year (FY) expenses: **Debt results from spending \$\$ that should've been reserved for paying accruals.**

Price gouging (pronounced either way) is not necessary, because **Hide-Bezzle**... allows the entity to show virtually ANY level of profit, or loss, that they desire.

This situation exists, to the detriment of the entity, at "managed" entities, like... not-for-profit entities, because the "managers," of that entity, don't give a hoot... about the entity itself. They just want to use it for what it has become, in the... modern day, which is a "**cash** cow," an entity that exists to benefit "the few,"... the rich people who either (a) **embezzle cash** from it, or (b) loan **cash** to it.

Entity managers are "**Professional Embezzlers**," and the rich people, who... loan \$ to the entity, are simply looking for a place to "park" their **cash** so that... they can earn some interest on their **cash** (**cash** that they, likely, **embezzled**... from another entity when they, themselves, were **Professional Embezzlers**).

If you own the entity, you might not put it in debt. Why? You stole so much \$... that you don't need to borrow (unless you just want more accrued liabilities).

However, if you only MANAGE the entity, or better yet, if the entity is owned by... someone else (preferably by the general public, like all not-for-profits), then... you simply allow your global masters, through your local corrupt CPA firm, to... assist you with reporting profit, or loss, every FY, according to the master plan.

Then, all that you do is roll in the dough. You're a "made" person, a mobster. **Everyone** (like us, **We The People**) who isn't a **mobster**, is just a slave to them.

<https://icanfundtheusa.com/>

Types of Cash and Cash Equivalents (C&CEQ). FYI: C-EQ = Cash Equivalents. Page 32 does not necessary show 100% of items that are considered C&CEQ. At FY end: All entities **SHALL** show **PROOF** of **C&CEQ** to **All Board Members**.

Remember, from pages 602 to 605: **Cash SHALL NOT BE JUST** a push value: **What does that mean? Governance Boards SHALL approve** real life **C&CEQ**.

C-EQ represents financial instrument ownership, often tying to a claim of **cash**:

- 1) Bills, coins, notes, money orders, cashier's/certified checks, demand deposits.
- 2) Foreign currency, after net conversion to local currency, which is USA dollars.

Cash Equivalent (C-EQ):

C-EQ dollar amount must be known.

C-EQ must have known a market price.

C-EQ should not be subject to meaningful price fluctuations.

C-EQ are investments that can **readily be converted into cash**.

C-EQ are highly liquid, easily sold on the market with easily accessible buyers.

C-EQ investment must be short-term, usually a max 90 day investment duration.

C-EQ must not expect significant change in value before redemption, or maturity.

Examples of Cash Equivalents (C-EQ):

- a) Certain Marketable Securities - Quickly convert to **cash** in a short time frame.
- b) Treasury Bills issued by the US government with terms from 4 to 52 weeks.
- c) Other Short-Term (Any) Gov't Bonds. Evaluate government agency bond risk.
- d) Banker's Acceptance. Promise of a future bank payment. Terms 30-180 days.
- e) Commercial Paper issued by corps. S/T bonds/debt. Avg 30; up to 270 days.
- f) Money Market. Interest-bearing. Similar to savings accts, but higher interest.
- g) Certificates of Deposits. Maturity date important whether a CD is C-EQ.

The following items are **Excluded** From Cash and Cash Equivalents:

- a) Any item that is used as collateral for credit.
- b) Inventory
- c) Unbreakable Certificate of Deposits
- d) Prepaid Assets
- e) Accounts Receivable (AR, an accrued asset, is NOT part of **Hide-Bezzle**)

**Cryptocurrencies** (not backed by any government, or entity) are **not** legal tender. USA **GAAP**: **Cryptocurrency** is **NOT** treated as **cash**, foreign currency, or C-EQ.

<https://icanfundtheusa.com/>

Did you review page 611? I wonder why no **TGH** Chief Legal Officer was listed?

Hm? Maybe **TGH** has not had a Chief Legal Officer, since, um, maybe... When? Come on, man! There has got to be some lawyer out there who wants that job...!

Hm? I don't know. Maybe no Chief Legal Officer (**CLO**), at **TGH**, is why the...  
...**TGH** OUTSIDE law firm (Carlton Fields, P.A.) hits up my website all the time.

You know, if **TGH** hadn't already spent about \$250,000,000 (\$250M) to \$300M...  
...of their fiscal year (FY) 2026 **cash** already, at the end of FY-2025 in the form...  
...of their undeniable lifetime **Hide-Bezzle**, then they would have been able to...  
...entice just about ANY lawyer, in the entire USA (any of them), to be their **CLO**.

You know... If I was the **TGH** Chief Embezzlement Officer (**CEO**), instead of...  
...Little Johnny **Couris**, I'd squash that Brunn guy with only one (that's a "1")...  
...lawsuit. I'd drag his **annoying** butt into court, and in only one (that's a "1")...  
...hearing, I'd have him under a temporary injunction, because he's **obviously**...  
...doing something that we can **persecute**, I mean prosecute, him on...!!!

Um, no, Little Johnny.

You're scared to wind up on trial for your **long-term crimes against humanity**.

You're just as chicken s \_ \_ \_ as everyone else out there in the business world.  
You just keep your mouth shut as you try to recruit new suckers to your board.

FYI, new board members: When **TGH** goes down, guess who else **goes down**?

- \* **Goes down** = If guilty, then society **SHALL** recommend harsh punishment.
- \* **Goes down** means the CEO, CFO, and anyone else who failed, right now...  
...to address, ON THE RECORD, the **TGH** **Hide-Bezzle** situation, and then...  
...**do something** about it. To the new 8 board members, since 2021-03-27...  
...**do something**, or be prepared to be judged, and to be judged harshly, by...  
...the mostly "historically oppressed minorities" that will be on YOUR jury.

Forget about a **jury of your peers**, because **your peers** will be sitting next to you.  
No, the lack of "peers" on your jury will NOT prevent you from having a jury...

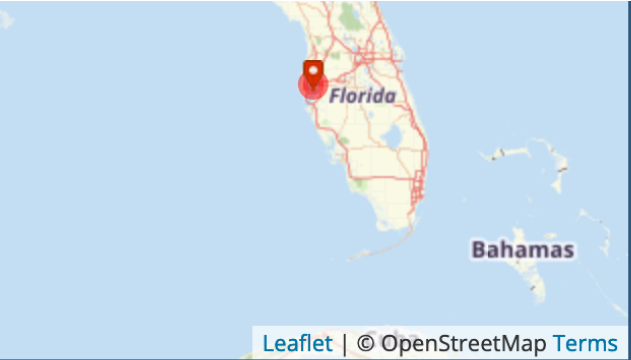

<https://icanfundtheusa.com/>

Re-review page 611: **TGH** just completed FY-2024, 10/01/2023 to 09/30/2024. During only the last 3.5 years, 50% of the **TGH** governance board is brand new.

The eight new people MIGHT still be **UNAWARE** of the massive fraud at **TGH**...? **UNAWARE**, that is, until recently when they learned about my website & books.

Since the above print screen is 1/2 of the proof that I need to establish that the...  
...**TGH** outside law firm hits up my website, on a regular basis, those eight new...  
...board members, at **TGH**, can no longer claim to be ignorant of the massive...  
...**cash embezzlement** charges against **TGH**, by me (of course), because that...  
...same **TGH** outside law firm HAS TO HAVE informed those eight new board...  
...members about my website, or else they themselves, at Carlton Fields, P.A.,...  
...risk putting THEMSELVES at risk of **assuming the responsibility** of all eight...  
...new board members, because they failed to inform those eight new board...  
...members of signing off on the FY-2024 **TGH** audit report without C&CEQ proof.

By the way, the other 1/2 of the proof, that I mentioned above, is my still private...  
...website list of website visitors. Said list is only a really long list of unknown IP...  
...addresses, but if you use any of the many IP address search websites, like...  
...the one that I show above, and if the IP address identifies the entity name, to...  
...Internet users like me, then the user entity name (like Carlton Fields, P.A.)...  
...CAN BE known to people like me. FYI, almost all of the people who visit my...  
...website remain unknown to me, that is, other than maybe what country, or...  
...city that are located in, but even then, if the visitor's IP address is from one...  
...place, but the visitor is visiting my website while located in another place...  
...then I'm guessing that their information still lists them as being from their...  
...place of origin, not their temporary physical location...? I don't know, or care.

In any case, the 8 new **TGH** board members are at risk of being coconspirators.

<https://icanfundtheusa.com/>

Co-conspirators. One of my favorite TV shows is Law, and Order, but only the...  
...somewhat older episodes, you know, the ones that aired before, say, ~ 2014.

In one of 1990s (?) episodes, the underboss DA said something like this:

"Since you were a **WILLING PARTICIPANT** in a...  
...long-term, ongoing, criminal conspiracy, you are **ALL**, if found guilty,...  
...eligible to receive the death penalty, and I will recommend just that."

Within 2 seconds, the accused person confessed & begged for only prison time.  
The worst **Hide-Bezzle criminals embezzle \$\$** from citizen owned **non-profits**.

My opinion is VERY clear on the issue of punishment, that is, for **Hide-Bezzlers**:  
We should NOT provide "3 hots & a cot," for life, or even for some set # of years.  
Instead, we should simply require long-term **Hide-Bezzle criminals** to (bleep)...

**Hide-Bezzler** assets will go to **We The People**, because they forfeit their assets.

If you were a willing participant, for a SHORT time, or for very small, private \$s,...  
...then you SHALL serve time in prison (not jail), and you SHALL forfeit all assets.

This is the START of the list of **Hide-Bezzlers criminals who should go down**.

- 1 The CFO + all folks who are in the CFO's chain-of-command **above** the CFO.  
CFOs are the Captain of their monetary ships, so they are guilty **by default**.  
History is full of naval flag officers who, duty bound, went down with their fleet.  
Included in this category are ALL CPA firm people who signed off on this fraud.
- 2 Every single person on the Board of Directors, and/or Board of Trustees.  
If you're 1 of these folks, especially at **TGH**, then get your head out of your...  
If the governance board cannot, and/or will not, protect us, then who will?
- 3 Every person at every outside type of agency who failed to stop **Hide-Bezzle**.  
Hey, I'm documenting everything that you do, and/or don't do, so get with it.  
Remember, with great power comes great responsibility: Do your damn job.  
**You still have time: If I'm WRONG about Hide-Bezzle, then prove it right now.**
- 4 Every person in law enforcement who intentionally failed to stop **Hide-Bezzle**.  
I already have a nice list of candidates, but it's not too late to change your fate.

<https://icanfundtheusa.com/>

Re-review page 611, but this time, pay attention to the **TGH** Corporate Secretary. He is, I believe, CEO of some entity, and he chairs 2 board committees at **TGH**. Which two? Audit & Compliance... Uh, oh... **TGH** has a NON-CPA at the helm?

Seriously: How difficult is it for a slick CPA firm (like KPMG) to snow this person? You know, if you can't find a CPA to chair those committees, then get a **stooge**...!

FYI, the "CPA" acronym stands for "Certified Public Accountant."

Note: The **TGH** Treasurer is not a CPA, but he is a **Construction Finance Officer**. What is a "Construction Finance Officer"...? Well, it's NOT the same as a CPA.

Construction Finance Officers are **EXPERTS** (Oh, YAY...! **EXPERTS**) on

- 1) Unique billing practices.
- 2) **Cash Flow** issues. (Like the **TGH** Statements of **Cash Flows** (SCF) report?)
- 3) Other construction specific challenges not found in other industries, like:  
Job costing, retainage, progress payments, and overbilling.

The **TGH** Board of Directors is stacked with "Chair" **stooges**, non-CPA **stooges**. A **stooge** is a person who's propped up, into a position of authority, by **criminals**.

Do these people have **ANY IDEA** about what is really happening at **TGH**?

Do these people have **ANY IDEA** that **TGH** manipulated them into their roles?

Do these people have **ANY IDEA** how easy it is for them to be found **GUILTY**?

Has **TGH** (and / or KPMG, LLP) told these people about my proven accusations?

You know, I shouldn't give a hoot about these 2 **stooges**, but I'm not heartless. Yo! Someone. Anyone... Please tell Casper & Celestan, **the truth** about **TGH**.

When I say "**the truth**," I mean

**The truth,**

**The whole truth, and**

**Nothing, but the truth.** (My 20-page **Hide-Bezzle** book contains **the truth**.)

When you tell those 2 **the truth**, pretend that you're in a court of law, and that...  
...their very lives depend upon them having known **the truth**, right now, or else...  
...they will, in all likelihood, wind up, immediately behind the CEO, and CFO, in...  
...line for the EXACT SAME punishment that SOCIETY gives to the CEO & CFO.

<https://icanfundtheusa.com/>

From about the 1950s to about the 1990s, my dad was a (not high paid) baker.

Even though he made only a modest living, he had what most can't afford today. Over a period of ~2 decades, he had a spouse, a house, a car, and 11 children. We did not starve, and to boot, they tithed, I think, 10% of their gross income. True, we had paper routes, and did neighborhood "kid" jobs to make spending \$.

Q: How was it that we all lived such normal, and happy, lives in a nice house?

A: My parents did not have to pay for EVERY entities FY **Hide-Bezzle** accruals. Unlike my parents, modern people are ripped off by, essentially, **ALL** entities. **Hide-Bezzle** jacks up **every** utility bill, **every** food item... **Every everything**.

See page 614: Little Johnny **Couris**, **TGH** CEO, is **personally** responsible for it. His **large group** of co-conspirators are, **also**, **ALL** collectively responsible for it.

Think "**long-term, ongoing, criminal conspiracy**..." They will all go down for it.

We'll get back to the days of **HAPPINESS** for all people, but to do that, we 1st...  
...have to stop **TGH** from issuing their 09/30/2024 audited financial statements,...  
...that is, unless said audit report admits to all previous **Hide-Bezzle**, does not...  
...**Hide-Bezzle cash**, and also lists all **TGH** investments at their true value, **not**...  
...the "Level II" nonsensical trashy explanation that I explain on Page 507 of my...  
...20-page **Hide-Bezzle** book. Oh, yeah, and go back to showing the proper...  
...accounting explanation for EXACTLY how **Property, Plant, and Equipment**...  
...changes from FY-to-FY, which includes additions, transfers, removals, and...  
...a separate, but identically formatted analysis, for **Accumulated Depreciation**.

From a **GAAP** (**G**enerally **A**ccepted **A**ccounting **P**inciples) perspective, **TGH**'s...  
...CPA firm issued audit reports are of such poor quality, that I wonder how any...  
..."old school CPA" (like me) is willing to sign off on such **COMPLETE TRASH**.

Once **Hide-Bezzle** unravels, folks like **TGH**'s board members will try to throw...  
...each other under the bus, but I'll **MAKE SURE** that my professional followers...  
...know to let those people speak, but to then find ALL of them COLLECTIVELY...  
...GUILTY for every dollar, at every single entity, that was **Hide-Bezzled**, EVER.

As the saying goes, heads will roll, 'til zero **Hide-Bezzlers** remain. **HAPPINESS**.

<https://icanfundtheusa.com/>

These final pages are a lead in for the **NEXT Hide-Bezzle** book that I'll write.

FYI: As a matter of law: Once published on the Internet, USA Courts consider...  
...100% of said "published" documents to be in the public domain... FOREVER.

My readers should be aware that **nothing** that I write about is CONFIDENTIAL.  
Conversely, EVERYTHING that I write about it PURELY in the PUBLIC DOMAIN.  
So, EVERY single THING on my website is 100% in the public domain. Period.

My next book will be a "tell all" about 6 of our State Boards of Accounting (BOA).  
"Tell all" means nothing will be sacred: Anything that I wrote will be fair game.  
Don't worry, those 6 State BOA wrote back precious little. They're too afraid.  
However, virtually everything that those State BOA wrote to me is also fair game.

To be fair, I waited until **after the** November 2024 Presidential **election** was over.

In summary of that yet unwritten book: My intent is to piss off every State BOA.  
Why would I want that? The answer's simple: **S\_IT, OR GET OFF THE POT.**  
These State BOA have had **AMPLE TIME** to make a decision. **AMPLE TIME.**

One State BOA email, to me, said that they had enough information to **proceed**.  
Ok, then... If you have enough information to **proceed**, then, um... Wait. for it...

**Oh, yeah: THEN PROCEED, OK? GET UP OFF YOUR REAR ENDS & RULE.**

In 1980, Ronald Reagan was declared the winner hours before midnight that day.  
The fact that we can't do that again, now, is due to (you guessed it) **Hide-Bezzle**.  
Follow the \$: You'll see that **Hide-Bezzle** is to blame for many societal issues.

Now that 6 State BOA know about **Hide-Bezzle**, what are they doing about it?  
The same thing that our 2024 election system does to our "votes"... Manipulate.

After I page 620, I'll start to compile the information for pages 541 through 560.  
One of the highlights of those 20 pages will be following every entity in question.

Do State BOA renew the CPA licenses that are associated with my complaints?  
Does my own (PA) State BOA renew MY own CPA license (expires 12/31/2025)?  
How can the PA State BOA renew CPA licenses on both sides of **Hide-Bezzle**?

<https://icanfundtheusa.com/>

..., but Mr. Brunn! We still have a lot of work to do! We can't just "make a ruling." Ok... That State BOA "proceed" email was dated Thursday, October 3, 2024. By the time I publish pages 541 to 560, it will be at LEAST a few months later. How much time does a State BOA need to make a decision about **Hide-Bezzle**?

Let's say that the State BOA in question gave that entity 30 days to respond. Let's say that the State BOA in question needs time to review the response.

Ok... How long? Remember, the mathematics are, at least now, SIMPLE. So SIMPLE, that each State BOA does not need input from the offending entities.

To all State CPA BOA: Their published audited financial statements (**AFS**) are...  
...THEMSELVES sufficient to warrant a GUILTY verdict. Did you, meaning the...  
...people on each State BOA, READ pages 501 to 520 of **Hide-Bezzle** book 5?

If we were discussing **TGH**, then isn't it intuitively obvious, at this point, to even...  
...the most casual observer, that **TGH** is absolutely GUILTY of **Hide-Bezzle**?

To each State BOA: Pretend that YOUR offending entity is **TGH**, ok?  
Review **Hide-Bezzle** book 5, and then review these 20 pages (602 to 620).  
Do you see any way, any way at all, that **TGH** can disprove their own **AFS** guilt?

**They DEDUCTED their Accrued Liabilities from Cash and Cash Equivalents.  
So: They REDUCED CASH for accrued bills that they DID NOT PAY YET...?**

In other words, their own **AFS** PROVE that they're a **Hide-Bezzle** GUILTY entity. Their own CPA firm audited annual reports (**AFS**) are **undeniable** GUILTY proof. Nobody disagrees with this and yet ALL of the State CPA BOA remain silent...???

Folks from all over the world download my files, but no matter where you live...  
...share my website address, and/or files, with everyone you know, PLEASE.

**I sell nothing.** All that I want is the truth, the whole truth & nothing, but the truth.  
\* If you think that you have been oppressed, then you are ABSOLUTELY correct.  
\* I think that our oppressors should pay for what they've done to **We The People**.

If you think that our oppressors have been White Old Rich People (WORP)...  
...then, again, you're absolutely correct. Token minorities, maybe. WORPs, yes.

<https://icanfundtheusa.com/>

What if State BOA members, who are also CPAs, participate in **Hide-Bezzle**?

If true, then all of those State BOA members **should** have **recused themselves**.

Pause... Pause... Uh, oh. Seriously... Uh, oh. Um, what to say, what to say...?

I can hardly believe that this occurred to me only as late as Friday, 10/25/2024.

This may be the MAIN reason why ALL of the State BOA, that I filed complaints...  
...with, failed to make a **Hide-Bezzle** ruling. Maybe every single State BOA is...  
...permanently hog-tied, you know, tied up in knots due to their own shared guilt.

**The State BOA, in Pennsylvania, has some openings. Here are the CPAs:**

Sheri L. Risler, CPA, Chair	Temple University, Professor; Program Director
Michael Ocker, CPA, Vice-Chair	CEO of Self-Named Entity
Keri A. Ellis, CPA	Large CPA Firm, Managing Director
John J. Grater, CPA	Tax Preparer, IRS Registered
Benjamin Holland, CPA	Butler County Controller
Charles A. O'Brien, CPA	Tax Preparer

My apology if any of my 6 Internet searches, above, are incorrect, or misleading.

**Based on my above six (hopefully correct) Internet searches:**

Sheri L. Risler, CPA, Chair	Higher education, so <b>Hide-Bezzle</b> is likely N/A.
Michael Ocker, CPA, Vice-Chair	Possible <b>Hide-Bezzle</b> participant.
Keri A. Ellis, CPA	Possible <b>Hide-Bezzle</b> participant.
John J. Grater, CPA	Tax side. <b>Hide-Bezzle</b> participation unknown.
Benjamin Holland, CPA	All government entities <b>can Hide-Bezzle</b> .
Charles A. O'Brien, CPA	Tax side. <b>Hide-Bezzle</b> participation unknown.

So, using JUST the PA State BOA as an example, **Hide-Bezzle** is likely a BIG...  
...money maker for at least the "Managing Partner" person, the Vice-Chair CEO...  
...could be personally involved in **Hide-Bezzle**, and based on what I've seen in...  
...virtually all government audits, the County Controller may also have signed...  
...off on **Hide-Bezzle**. Tax preparers are innocent until proven guilty, and the...  
...higher education person is likely teaching, etc., not actively **Hide-Bezzling**.

<https://icanfundtheusa.com/>

I like distributing these first 2 **Hide-Bezzle** books, but not the subsequent books. All subsequent **Hide-Bezzle** books will be available only online on my website. My first two **Hide-Bezzle** books fit nicely in those real nice "stay flat" mailers.

Pages 701 to 720 will be an honest, and scathing, look at certain State BOA. Pages 801 to 820 will be about known **Hide-Bezzlers**, and people WILL be mad. Pages 901 to 920 will likely, again, be about those State BOA. Why them again?

If you haven't figured this out yet: No State BOA will EVER rule on **Hide-Bezzle**. End of story, can't happen, won't happen, period. We can't take down everyone.

Go back, and look at page 619 again. If my Internet search was correct, then...  
...the Chair of the State BOA, in PA (my home state), is a smart person, and...  
...she's so smart, that she's a double big-shot at a really well known university.

How can she admit that the CPA education system COMPLETELY avoids...  
...teaching young accountants about the many hidden aspects of **Hide-Bezzle**?

I'm the product of our PA education system (CPA (PA), Accounting BSBA, MBA,...  
...Inactive Certified Internal Auditor, and Inactive Certified Healthcare Financial...  
...Professional (HFMA)), and I will attest, under oath, that our CPA education...  
...system does NOT prepare students (like me, back in the day) to identify...  
...**Hide-Bezzle**. The Statements of Cash Flows (SCF) report is one of those...  
...things that virtually NO ONE EVER openly discusses. IT IS CRAZY.

Go back, and look at page 619 again. If my Internet search was correct, then...  
...the Vice-Chair of the State BOA, in PA, is the CEO of his own CPA firm, and...  
...if that's true, then there's just about a 100% chance that he's a **Hide-Bezzler**.

How can this self-named CPA firm "CEO" say "GUILTY" to others? Haha. Not.

The bottom line: The CPA industry is self-regulating. We do not control them. However, they control **We The People** by "holding all of the (**embezzled**) gold." You know: Gold that they **embezzled** from us via the **crime** I call **Hide-Bezzle**.

Asking a State BOA system to discipline **Hide-Bezzlers** is like asking the local...  
...fox pack to discipline a fox that stole my chickens: Ain't happening, so I hope...  
...my first two books educate **We The People** so that we can force this change.
