

This is "The Short Paper," and it will allow for a quick resolution of any...
...complaint that I filed with "CPA State Boards of Accountancy (BOA)."

Prior to reading this one-page paper, you **SHALL** have already read...
...my 8 "**Juneteenth National Independence**" books, because if you...
...did **not** already read those books, you will **not** understand this paper.

I call my books that, because I want to free "**We The People**" from the...
...**Professional Embezzling Monetary Rapists (PEMR)** who enslave...
...virtually everyone who is not a **PEMR**. Few **We The People** slaves...
...achieve the rags-to-riches American Dream that we all try to achieve.

First, in regards to topics of conversation that accused entities make,...
...State BOA should **COMPLETELY** ignore any, and **ALL**, references...
...to whether the entity is following any type of accounting rule, and/or...
...regulation. This isn't about whether the entity is following some rule,...
...or whether their audit was done in accordance with some standard.

TGH-Embezzle is about this: Are certain people **embezzling cash**?

Fact: On Planet Earth, or at least in the USA, virtually every audited...
...entity claims to be in compliance with FASB ASU 2014-09, and you...
...know if that's true by reviewing their FY-2019-2018 audit report notes.

CPA State BOA entities **SHALL** ask this question **FIRST**:

When you "complied" with FASB ASU 2014-09 during the Fiscal Year...
...(FY) that we're asking about, did you remove, from the audit report,...
...both "Good Debt Revenue" (**GDR**), and "Bad Debt Expense" (**BDE**),...
...**OR** did you remove **JUST** a negative value that represents bad debt?

They offset embezzled cash against **GDR**, that's how they free up the...
...**cash** that they **embezzle**. The non-cash item **BDE** is removed from...
...reports where every value is equal to **BOTH** Net Assets, and **CASH**.
